

Biosecurity for farm events or other on-farm group activities

The Policy for biosecurity for farm events or other on-farm group activities organised/managed by ADAS is to follow the two other current ADAS Policies and associated Codes of Practice "Biosecurity visits to premises with farmed livestock and poultry (FLP)" and "Biosecurity for visits to arable/horticultural premises" wherever practically possible. These are written with reference to Defra published guidance and good practice on biosecurity.

There is an associated Code of Practice (CoP) to this policy available on the Intranet, detailing specific requirements to be implemented on top of the requirements in the CoPs for FLP premises and arable/horticultural premises.
